Synthia Hunter Achieng

Entry-Level Software Developer

Hunter is a highly organized and self-motivated student pursuing a Diploma in IT at AkiraChix. She has an interest in software development and is looking for an opportunity as an entry-level Software Development intern. She has skills in vanilla Javascript, Python, and Django and is currently learning React and Node.js. With these skills, she has developed the ability to learn and practice clean code. Currently, she is working on a reward system that leverages bitcoin for her institution.
